DETAIL ACTION

Drawings

1. The drawings were received on July 22, 2004. These drawings are accepted.

Reasons For Allowance

2. Claims 1-21 are allowed.
3. The following is an examiner's statement of reasons for allowance: the prior art of record fails to improve a system and a method as well for processing substrate in utilizing a matching network having independently control portions of resistive elements and reactive elements, in that, the impedance matching network, coupled with the alternating voltage supply, comprises a variable resistive element having a first plurality of states to define distinct real parts of an impedance in accordance with the first plurality of states and a variable reactive element having a second plurality of states to define distinct imaginary parts of the impedance in accordance with the second plurality of states as required in claims 1 and 14.
4. The remaining dependent claims are allowable for at least above reason.
5. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. Noh (US Pat. 6,819,096) discloses power measurement mechanism for a transformer coupled plasma source. Bennett (US Pat. 6,495,963) discloses inductive coil assembly having multiple coil segments for plasma processing apparatus. Collins et al. (US Pat. 6,252,354) discloses RF turning method for an RF plasma reactor using frequency servoing and power, voltage, current or DI/DT control. None of cited prior arts stands alone or combination with others discloses all limitation required in claim invention.

Correspondence

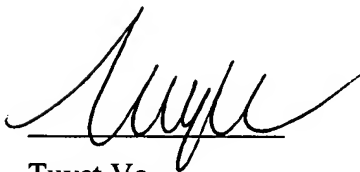

Any comments considered necessarily by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
